

Why a New OK-FIRE?

- Website is more than 10 years old (started 2006)
- Technology has advanced
- WeatherScope (*used for map animations and zooming*) is no longer supported by most browsers on computers, and not supported by tablets and smartphones
- Desire to integrate OK-FIRE into general Mesonet website

Developing the New OK-FIRE

- Process started well over a year ago
- Two OK-FIRE users forums in March 2016 to help Mesonet designers figure out the most important elements for the “landing page” (home page of the module)
- Work has continued through the present in developing this new module

Mesonet Users Forum in Mustang (March 3, 2016)

Mesonet Users Forum in Shawnee (March 7, 2016)

User Forum Recommendations for New OK-FIRE Landing (Home) Page

We would like to acknowledge the following Mesonet website designers and developers without whom this new OK-FIRE module would not be possible:

Ada Shih

Kyle Davis
